## EXPERIENCE

### MACHINE LEARNING RESEARCHER | Kindred Systems Inc

Artificial Intelligence Research Team | Toronto, Canada | Sep 2017 to Present

- Designed, implemented and evaluated learning algorithms and robot infrastructure as a part of the research and publication efforts at Kindred.
- Implemented AI and control methods for SORT, a piece-picking robot that grasps, scans and stows items.
- Developed Deep Reinforcement Learning (RL) techniques to SORT's improve scans per hour (a key performance indicator) and overall throughput at e-commerce fulfillment centres.
- Supported design and development of SenseAct, an open-source computational framework for physical robot learning tasks.

### RESEARCH VOLUNTEER | The Hospital for Sick Children (SickKids)

Computer Vision Research | Toronto, Canada | May 2019 to Present

- Developing neural network models capable of segmenting and calculating Wilm's tumor volume from CT scan images.

### RESEARCH ASSISTANT | BLINC and RLAI Lab

Labs headed by Dr. Patrick M. Pilarski and Dr. Richard S. Sutton, University of Alberta | May 2016 to Aug 2017

- Developed Actor-Critic Reinforcement Learning (ACRL) methods that would allow an amputee to use their non-amputated arm to teach their prosthetic arm how to move through a wide range of coordinated motions and grasp patterns. This study included 3 able-bodied subjects and 1 trans-radial amputee.
- Developed interfaces for human robot interaction using Delsys Trigno, Thalmic Myo, CyberGlove and the Bento Arm.
- Collaborated on a medical study to assess functional gain with the use of assistive robots in patients affected by stroke or spasticity. Built tools to analyze the recorded sensory information and set up a robot interface for 12 patients.

### TEACHING ASSISTANT | CMPUT 174: Introduction to the Foundations of Computation I

Instructors: Dr. Duane Szafron, Dr. Sadaf Ahmed and Dr. Jorg Sander, University of Alberta | Sept 2015 to April 2016

- A problem-based intro to computing science to focus on expressing problems precisely, solving them algorithmically by showing how to construct a solution, and then implementing that solution by writing a program using python.
