## EXPERIENCE

### MACHINE LEARNING RESEARCHER | KINDRED SYSTEMS INC

Artificial Intelligence Research Team | Toronto, Canada | Sep 2017 to Aug 2020

- Designed, implemented and evaluated learning algorithms and robot infrastructure as a part of the research and publication efforts at Kindred.
- Devised Artificial Intelligence (AI) techniques for SORT, a piece-picking robot that grasps, scans and stows items in warehouses for clothing stores like GAP and American Eagle.
- Supported design and development of **SenseAct**, an open-source computational framework for physical robot learning tasks.
- Developed **RLScan**, which uses deep reinforcement learning (RL) to learn a closed-loop control scanning policy, conditioned on a real-time video feed. An RL agent is trained end-to-end directly in production, learning from a fleet of robots across multiple production sites.
- RLScan achieved optimal barcode scanning behavior for handling complex product assortments. This is among the **first successful demonstrations of vision-based deep RL in warehouse automation**.

### GRADUATE RESEARCH ASSISTANT FELLOW

RLAI Robotics Lab headed by Dr. A. Rupam Mahmood, University of Alberta | Sept 2020 to Present

- Design and development of Reinforcement Learning (RL) algorithms and continual learning systems for real-world robots.
- Lab manager for RLAI Robotics. I'm responsible for the maintenance of robots, hardware and resource allocation for the lab.
- Organizer of a weekly AI reading group to discuss research papers in the intersection of reinforcement learning, deep learning, neuroscience and robotics.

### BLINC AND RLAI

Labs headed by Dr. Patrick M. Pilarski and Dr. Richard S. Sutton, University of Alberta | May 2016 to Aug 2017

- Developed Actor-Critic Reinforcement Learning (ACRL) methods that would allow an amputee to use their non-amputated arm to teach their prosthetic arm how to move through a wide range of coordinated motions and grasp patterns. This study included 3 able-bodied subjects and 1 trans-radial amputee.
- Developed interfaces for human robot interaction using Delsys Trigno, Thalmic Myo, CyberGlove and the Bento Arm.
- Collaborated on a medical study to assess functional gain with the use of assistive robots in patients affected by stroke or spasticity. Built tools to analyze the recorded sensory information and set up a robot interface for 12 patients.

## TEACHING ASSISTANT

### CMPUT 365: AN INTRODUCTION TO REINFORCEMENT LEARNING

Instructor: Dr. A. Rupam Mahmood, University of Alberta | Winter terms 2021 & 2022

- This course provides an introduction to reinforcement learning intelligence, which focuses on the study and design of agents that interact with a complex, uncertain world to achieve a goal.

- A problem-based intro to computing science to focus on expressing problems precisely, solving them algorithmically by showing how to construct a solution, and then implementing that solution by writing a program using python.

## RESEARCH VOLUNTEER | THE HOSPITAL FOR SICK CHILDREN (SICKKIDS)

Computer Vision Research | Toronto, Canada | May 2019 to Dec 2019

- Developing neural network models capable of segmenting and calculating Wilm's tumor volume from CT scan images.

## ACHIEVEMENTS

- Awarded the **DAAD AINet Postdoctoral Networking Fellowship 2022** to visit and foster collaborations with research labs in Germany.
